precision starts before the first print

Wikoff Graphics delivers a complete graphics platform combining prepress services, print-ready plate production, equipment, workflow solutions, consumables, and technical support.

More than a distributor, we serve as your strategic partner, helping improve print quality, reduce downtime, increase productivity, and maximize return on investment.

From concept to pressroom, our team provides the expertise, technology, and service required to keep production running efficiently.

Wikoff Graphics is fully integrated into Wikoff's broader capabilities:

- Inks & Coatings
- Digital Printing Technologies
- Pressroom Chemicals
- Technical Solutions

This unified platform allows customers to streamline suppliers, simplify operations, and improve performance across the entire print process.

complete solutions from one trusted partner

MATERIALS & CONSUMABLES

Photopolymer plates, mounting tapes, processing chemistry, and pressroom consumables sourced from industry-leading partners.

EQUIPMENT & SOFTWARE

Imaging, processing, finishing, and workflow automation solutions that help modernize operations and improve productivity.

TECHNICAL SERVICES

Installation, preventative maintenance, troubleshooting, repair, and application support that keep operations running at peak performance.

PREPRESS & PRINT-READY PLATES

Artwork optimization, color management, digital workflows, and high-quality print-ready plate production designed to deliver consistent, repeatable results.

one partner. total solution.

Wikoff Graphics integrates materials, technology, and service into a single, streamlined solution, helping customers reduce complexity, improve performance, and drive operational efficiency.

WHY CUSTOMERS CHOOSE WIKOFF GRAPHICS:

Technical Expertise That Makes a Difference

- **Plate Selection & Application Support** – Recommending the right plate technology and processing approach for optimal performance.
- **Fingerprinting & Press Characterization** – Establishing a data-driven foundation for predictable print performance and repeatable results.
- **Curve & Screening Optimization** – Improving print quality, tonal reproduction, and press efficiency through advanced screening technologies.
- **Workflow & Color Management** – Enhancing process control, color consistency, and production accuracy from prepress through production.
- **Press Optimization & Troubleshooting** – Identifying opportunities to improve quality, productivity, and overall operational performance.
- **Equipment Installation & Technical Service** – Providing installation, preventative maintenance, troubleshooting, and ongoing technical support.
- **On-Site Training & Ongoing Support** – Delivering hands-on training and technical resources to support long-term success.

built for real-world performance

Wikoff Graphics supports a wide range of printing and packaging applications:

the Wikoff advantage

- Dedicated Graphics Technical Team
- Print-Ready Plate Manufacturing
- Equipment Installation & Field Service
- Workflow & Process Optimization
- North American Distribution & Supply Chain Network
- Training & Education Resources
- Access to Industry-Leading Technology Partners

PROVEN PERFORMANCE. PRACTICAL RESULTS.

Combining industry-leading technology, technical expertise, and hands-on support, Wikoff Graphics helps customers improve print quality, increase operational efficiency, reduce waste, and achieve consistent, repeatable results.

From prepress through production, we support a wide range of printing and packaging applications, delivering practical solutions that help customers optimize performance and achieve measurable results.

AsahiKASEI

leading innovation in photopolymer plate technology

Asahi Photoproducts is a global leader in flexographic plate technology, known for its commitment to innovation, sustainability, and print performance.

Through our partnership with Asahi, Wikoff Graphics delivers advanced photopolymer plate solutions designed to improve print quality, reduce waste, and increase pressroom efficiency.

Key Benefits:

- Superior ink transfer for cleaner, sharper print results
- Reduced press stops and improved overall equipment effectiveness
- Sustainable plate solutions with reduced VOC emissions
- Consistent, repeatable performance across applications

Asahi's CleanPrint technology helps printers achieve optimal ink transfer with minimal pressure—resulting in higher quality output and increased productivity.

WIKOFF ADVANTAGE

Wikoff Graphics supports customers through every stage of implementation, from plate selection and application testing to workflow optimization and pressroom support. Our team works alongside customers to ensure they achieve the full performance benefits of Asahi technology.

Engineered for Performance: The Asahi Plate Portfolio						
Segment	Washout	Plate Type	Original Dot Shape	CleanPrint	Summary	Applications (Examples)
AWP™-REVO	Tap-water	WHR	Round		Premium tap-water washable plate requiring no detergent and delivering complete platemaking in under one hour. High screening resolution, fade-to-zero highlights, exceptional ink transfer, and superior flexibility minimize lift-off. Compatible with solvent-, water-, and most UV-based inks, helping customers reduce processing costs, improve sustainability, and maximize press efficiency.	Film, Coated Paper, Label
		WHF	Flat			
AWP™	Water	CLFQ	Flat		Premium flat-top plate engineered for the highest print quality applications. Capable of reproducing the finest pixel-level detail with UV-LED exposure, it delivers gravure-quality solids, smooth tonal transitions, excellent text and line work reproduction, and exceptional register stability. Customers benefit from reduced ink consumption, improved color consistency, and reliable performance.	Film, Coated Paper, Label
		CLFT (CleanFlat)	Flat		Premium flat-top water-wash plate designed for stable highlight dots and high screening resolutions. Excellent ink transfer, broad compatibility with solvent-, water-, and UV-based inks, and rapid platemaking support consistent production. Superior flexibility minimizes plate lift-off, helping customers improve print consistency while supporting environmentally responsible manufacturing.	Film, Coated Paper, Label
		DEW	Round		Premium round-top water-wash plate delivering high screening resolution, small dot reproduction, and smooth fade-to-zero highlights. Exceptional ink transfer, broad compatibility with solvent-, water-, and most UV-based inks, and complete platemaking in under one hour improves efficiency. Superior plate flexibility minimizes lift-off while supporting consistent, high-quality print reproduction.	Film, Coated Paper, Label
		CLFM (CleanFlat Medium)	Flat		Medium-hard flat-top water-wash plate engineered for homogeneous ink coverage on rough and challenging substrates. Compatible with solvent-, water-, and UV-based inks and designed to work with standard workflows, bank-light, and XPS exposure technologies. Customers benefit from balanced solid and screen reproduction, greater application flexibility, and consistent print performance.	Coated and Uncoated Paper, Recycled Film, Preprint, Folding Carton
AFP™-REVO	Solvent (Less solvent)	HF	Flat		Advanced solvent plate featuring a unique structure that reduces washout chemistry consumption, drying energy, and drying time by up to 50% compared with conventional solvent plates. Customers benefit from lower operating costs, increased throughput, and reduced environmental impact without sacrificing performance.	Film, Coated Paper, Label
AFP™	Solvent	NFT	Flat		Hard flat-top solvent plate optimized for advanced screening and microcell technologies. Produces exceptional solid ink homogeneity, smooth tonal transitions, and strong highlight reproduction while remaining compatible with solvent-, water-, and most UV-based inks. Implementation utilizes existing equipment, allowing customers to improve print quality and productivity with minimal investment.	Film, Coated Paper, Label
		TOP	Round		Premium hard round-top plate designed for high screening resolutions, fade-to-zero highlights, and superior print performance. Compatible with solvent-, water-, and most UV-based inks and optimized for advanced screening technologies. Customers benefit from excellent image reproduction, reduced plate cleaning interruptions, improved press efficiency, and reliable performance.	Film, Coated Paper, Label
		DSF	Round		High-performance solvent plate engineered for exceptional solid ink coverage and balanced reproduction of tonal areas, text, and halftones. Optimized for solvent- and water-based inks, it features wide exposure latitude, strong ozone resistance, and excellent flexibility for small-diameter cylinders. Customers benefit from consistent print quality, reliable plate storage, and long-run performance.	Film, Paper
		NSE2	Round		Specialty corrugated plate engineered with optimized hardness and resilience to compensate for uneven printing surfaces. Designed to meet demanding quality requirements, it maintains image consistency across challenging substrates while minimizing the impact of surface irregularities. Customers benefit from improved print uniformity, reduced defects, and reliable performance.	Corrugated board, Solid board, Heavy-duty bags
		LGR (Leggero)	Round		Ultra-soft plate engineered to print with minimal kiss-touch pressure while maintaining excellent ink coverage and image quality. Its unique construction minimizes washboarding and virtually eliminates board crush, helping preserve package integrity. Customers benefit from improved package appearance, reduced waste, and superior corrugated print performance.	Corrugated Board, Lightweight Corrugated Board

driving efficiency through workflow & automation

Esko is a global leader in software and hardware solutions for packaging, labeling, and prepress workflows.

Wikoff Graphics partners with Esko to help customers bridge the gap between design and production—streamlining processes, reducing errors, and accelerating time to press.

Key Benefits:

- End-to-end workflow automation
- Advanced prepress tools for file preparation and plate production
- Seamless integration across design, proofing, and production systems
- Improved accuracy and reduced manual intervention

Esko solutions enable customers to simplify complex workflows while maintaining precision and consistency across every job.

WIKOFF ADVANTAGE

We provide implementation guidance, integration support, and ongoing expertise to ensure customers fully leverage their Esko investment.

high-performance plate processing solutions

Vianord is a trusted provider of advanced plate processing equipment, delivering reliability, consistency, and efficiency in prepress operations.

Through our partnership, Wikoff Graphics offers Vianord's industry-leading processing systems designed to support high-quality flexographic plate production.

Key Benefits:

- Reliable, high-performance processing equipment
- Consistent plate quality across production runs
- Efficient workflows that reduce variability and waste
- Scalable solutions to meet growing production demands

Vianord systems are engineered with the customer in mind—ensuring durability, ease of use, and long-term performance.

WIKOFF ADVANTAGE

From equipment selection to installation and ongoing support, Wikoff ensures seamless integration into your production environment.

reliable prepress equipment for consistent results

Glunz & Jensen is a global leader in prepress equipment, known for delivering innovative and dependable solutions for plate processing.

Wikoff Graphics partners with Glunz & Jensen to provide equipment that enhances efficiency, improves consistency, and supports high-quality output.

Key Benefits:

- Proven, reliable prepress equipment
- Optimized processing for consistent plate quality
- Reduced downtime through durable system design
- Flexible solutions for a range of production needs

With a strong reputation for quality and innovation, Glunz & Jensen helps set the standard for prepress efficiency.

WIKOFF ADVANTAGE

We help customers select, implement, and maintain the right equipment to maximize performance and ROI.

precision cutting & finishing solutions

Kongsberg is a global leader in digital cutting systems, delivering precision finishing solutions for packaging, labels, and display applications.

Through our partnership, Wikoff Graphics provides cutting-edge finishing technology that enhances productivity and accuracy.

Key Benefits:

- High-precision cutting and finishing
- Increased production efficiency
- Versatile solutions for multiple substrates and applications
- Scalable systems for growing operations

Kongsberg systems are designed to deliver speed, accuracy, and flexibility—supporting modern production demands.

WIKOFF ADVANTAGE

We help customers integrate Kongsberg systems into their workflow to maximize throughput and performance.

TECHKON®

precision color measurement & quality control

Techkon specializes in advanced color measurement and quality control solutions for the printing industry.

Wikoff Graphics partners with Techkon to help customers achieve accurate, consistent color across every job and every press.

Key Benefits:

- Accurate color measurement and control
- Improved consistency across print runs
- Enhanced quality assurance and process control
- Easy-to-use solutions for pressroom operators

Techkon systems provide the data and insight needed to maintain color fidelity and meet brand expectations.

WIKOFF ADVANTAGE

We integrate Techkon solutions into your workflow and provide training to ensure consistent, repeatable results.

advanced mounting tape solutions for precision printing

ORAFOL is a global leader in pressure-sensitive materials, offering high-performance mounting tapes designed for flexographic printing applications.

Through this partnership, Wikoff Graphics delivers solutions that improve plate mounting accuracy, print consistency, and pressroom efficiency.

Key Benefits:

- Precise plate mounting for consistent print results
- Optimized adhesion and release performance
- Reduced vibration and improved print quality
- Solutions tailored for a variety of print applications

ORAFOL's mounting technologies play a critical role in achieving repeatable, high quality print performance.

WIKOFF ADVANTAGE

We provide application expertise and hands-on support to ensure optimal tape selection and performance in your pressroom.

let's build your perfect prepress solution

Whether you're upgrading equipment, optimizing workflows, or improving plate performance, Wikoff Graphics is your trusted partner.
