beyond color

packaging that performs

In folding carton printing, packaging has to do more than look good. It must protect the product, communicate the brand and perform consistently through printing, converting and the demands of the marketplace. Wikoff delivers inks, coatings and color solutions engineered for exceptional printability, durability and visual impact across commercial and consumer folding carton applications.

FORMULATED FOR PACKAGING REQUIREMENTS

Wikoff offers low-migration, low-odor and PFAS-free ink and coating systems designed to support the evolving requirements of food, pharmaceutical and retail packaging. Our chemists, regulatory compliance and analytical teams work closely together to help ensure our products align with current industry standards and customer requirements, including Nestlé-compliant applications.

COLOR THAT COMMANDS ATTENTION

High-strength ink systems deliver vibrant, consistent color, sharp graphics and excellent print quality—helping brands stand out on shelf while maintaining reliable press performance.

PERFORMANCE ACROSS BOARD STOCKS

Solutions engineered for coated, uncoated and specialty paperboard, with formulations designed to provide dependable adhesion, rub resistance and converting performance.

EFFICIENCY & SUSTAINABILITY

Fast-curing, press-efficient technologies help improve productivity, while formulation options are designed to support evolving sustainability and packaging requirements.

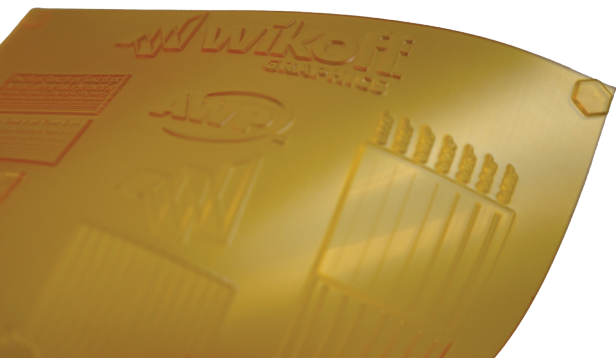

from your solutions supplier

INNOVATION RUNS DEEPER THAN INK

Imagine being able to rely on one trusted supplier for more of your pressroom needs. Wikoff combines ink and coating technology with color expertise, technical support and complementary printing solutions to help folding carton converters improve quality, productivity and consistency.

Need your package to stand out?
Engage our team early in the design process to explore specialty coatings and effects that enhance shelf impact.

beyond the ink

Inks, OPVs and specialty coatings that enhance appearance, protection and performance.

precision in coating

Encore® Coating Plates are engineered for spot and specialty coating applications, delivering exceptional registration, extended plate life and consistent coating results press after press.

agility at scale

Wikoff Digital provides inkjet inks and primers for advanced digital and hybrid printing applications, supporting opportunities in versioning, personalization, coding and shorter production runs.

your partner in folding carton performance

In the world of folding carton printing, appearance and performance go hand in hand. Wikoff's inks, coatings and color solutions deliver exceptional printability, durability and visual appeal for packaging that protects, promotes and performs across commercial and consumer markets.

Consult with your local Wikoff representative for specific products to meet your unique needs.
