

ENCORE®

COATING PLATES

beyond color

benefits

EXCEPTIONAL REGISTRATION

Engineered for outstanding plate-to-plate consistency, delivering precise registration for even the most demanding coating applications.

EXTENDED PLATE LIFE

Durable photopolymer construction withstands long production runs while reducing plate replacements and lowering operating costs.

UNIVERSAL COMPATIBILITY

Compatible with solvent-based, water-based and UV-based coating systems across today's offset printing platforms.

precision that performs

BETTER REGISTRATION.

LONGER PLATE LIFE.

SUPERIOR COATING RESULTS.

Today's offset printers demand coating plates that deliver exceptional consistency, superior coating results, and maximum productivity. Encore® Coating Plates are engineered specifically for spot coating and specialty coating applications, providing outstanding registration accuracy, exceptional durability, and industry-leading CleanPrint™ technology.

Manufactured using advanced Asahi photopolymer technology, Encore® delivers consistent, repeatable performance and high-quality coating results press after press.

performance that keeps you running

INNOVATION BUILT INTO EVERY PLATE.

Encore® combines proven coating performance with CleanPrint™ technology to help printers maximize uptime while producing exceptional coated graphics.

CLEANPRINT™ TECHNOLOGY

Encore® plates feature advanced low-surface-energy photopolymer technology that transfers more coating to the printed substrate while minimizing coating buildup on the plate surface.

The result is:

- Cleaner reverses
- Sharper image detail
- Better solid coverage
- Less press cleaning
- Higher productivity
- Longer uninterrupted press runs

engineered for today's pressroom

AVAILABLE GAUGES

Available in both 0.045" and 0.067" thicknesses for a wide variety of offset coating applications.

CUSTOM EDGE BARS

Lead and tail edge bars are available to meet individual press specifications.

SUPERIOR COATING TRANSFER

Produces smooth, homogeneous coating coverage that enhances visual appeal and consistency.

OUTSTANDING COATING QUALITY

Delivers consistent coating transfer, clean reverses, precise detail and uniform coverage for spot and specialty coating applications.

BUILT FOR PRODUCTIVITY

Less cleaning. Less downtime. More profitable pressroom performance.

your trusted graphics solutions partner

For decades, printers across North America have relied on Wikoff for innovative technologies, technical expertise and responsive support that help improve quality, streamline production and maximize pressroom performance.

We combine proven plate and prepress technologies with hands-on technical expertise and customer support to help solve pressroom challenges and deliver consistent, reliable results.

Wikoff Graphics is more than a supplier—we're a trusted graphics solutions partner committed to helping our customers perform better on press.
